Apply Configuration

High Availability

☒ Standalone MySQL Server / Classic MySQL Replication

Choose this option to run the MySQL instance as a standalone database server with the opportunity to configure classic replication later. With this option, you can provide your own high-availability solution, if required.

☐ Sandbox InnoDB Cluster Setup (for testing only)

The [InnoDB cluster](#) technology provides an out-of-the-box HA (high availability) solution for MySQL using Group Replication.

This option enables you to test an InnoDB cluster setup on your local computer using several MySQL Server sandbox instances. Read about [Sandbox Deployment of InnoDB Cluster](#) to learn more.

To setup and configure a real-world production InnoDB cluster use the [Create a New InnoDB Cluster](#) or [Add Local MySQL Server Instance to an InnoDB Cluster](#) options available for MySQL Server 8.0.

InnoDB Cluster Log Verbosity Level

The log level for InnoDB cluster configuration.
